

Our 2020 Vision

let us begin our vision quest
to reach balance by 2020
to receive our guidance, to become unstuck
we must seek to go to empty

enter the silence, the stillness within
release the cellular trauma
enter the centrifuge, be in the spin
allow it to dissolve the drama

once all is released feel it all slow down
and feel into the empty
you're held within the stillest of water
a place to create the plenty

plentitude exists in the future's unknown
only to those who crave it
plentitude, a magical tool of bliss
for those who want to create it

envision a world where all is one
a oneness that holds awareness
every thought and action that we have
is a building block from our shareness

a bare empty slate, an artist's canvas
holds future's remarkable potential
but no longer flat, to construct the new
being multi-dimensional is essential

we know that water, light and sound
are the elements of creation
and to create our 2020 vision
the glue is our love, then elation

the love that we feel that's in our hearts
can expand into total elation
it's a knowing of sorts when we've done our parts
to contribute to uniting nations

the illusion has been a disconnect from within
to universes beyond comprehension
so enter them now, we are being shown how
it is where time is held in suspension

co-creators are told, they can have all the gold
that ever was there to behold
but only by knowing the value of wealth
will we understand the gold is the love in one's self

and the love held within is where to begin
for emptiness cannot be empty of love
....*love is all there is*....
creation unfolds when we all align
and desire a magnificent new future design

designed to hold the diversity of form
of balance, of harmony and abundance
where all is sustainable, in the flow
a perfectly orchestrated Sundance

a prayer for life, world renewal, thanksgiving
always looking after each other
blessing Creator's amplitude
in giving us Earth as a mother

2020 is but five years away
yet stretches in all directions
our design to create the world we want
will be a web with many intersections

science and technology may be used to design
what is engineered potential
the skills of the builders will be required
and love infusion by all is essential
let our prayers extend into times without end
let our visions ensphere all potentials
let our desire to serve in the oneness reserve
be complemented by the multi-dimensional

2020 exists in a future we can see...
from empty to there and back to be
it's the shortest distance imaginable
begin. begin to create the new
its existence no longer unfathomable

2020 awaits in its blue-green form
illusions now all but extinguished
let us all commit, it is time to sit
ensphering a vision that we've made central

a central dot or a building block
we have experience and wisdom gathered
let's bring it together, as birds of a feather
and build the new multi-dimensional
